 - Dramatically cut costs and increase business results
- Registered PMI® education provider
- Instructors are certified PMPs with more than 20 years of experience

Project management training that drives business results

Bringing PMI® best practices to life in the classroom through real-world project scenarios

Successful projects require highly competent project teams. At RiverPoint, we help you build superior teams by delivering project management training that incorporates real-world project scenarios. Our dynamic and interactive sessions ensure participants gain knowledge and skills they can immediately put to use.

Taking PM training to the next level

We take traditional project management training one step further by delivering a program that combines Project Management Institute (PMI) Knowledge Areas with RiverPoint's proven best practices and tools. Our program incorporates RiverPoint's interactive System Delivery Framework (SDF), best-in-class tools and proven techniques developed through hundreds of successful client engagements. As a result, participants not only learn PMI theory and concepts; they learn the best way to apply this knowledge to deliver projects that drive positive business results.

Course overview

This comprehensive course covers all aspects of RiverPoint's proprietary SDF (see graphic below). It teaches the skills necessary for planning and managing projects of all types and sizes, and integrates PMI Knowledge Areas throughout. RiverPoint is able to customize the content to meet each client's specific needs.

Among the topics covered:

- Project Management Essentials
- Integration Management
- Scope Management
- Time Management
- Cost Management
- Quality Management
- Human Resources Management
- Communications Management
- Risk Management
- Procurement Management

RiverPoint		RiverPoint SDF - Overview, Narrative

Legend: Required: † Optional: f									
On Time. On Budget. Of Value.									

Who should attend

This program is aimed at companies that want to take project management knowledge beyond PMI certification to solve real-world business problems. It is ideal for companies seeking to:

- Create a performance-driven culture by embedding project management best practices throughout the enterprise
- Use ROI metrics to measure project management impact on the business
- Maximize the performance of highly dispersed or newly integrated project teams
- Enable project teams to work collaboratively, develop synergy and deliver positive outcomes

Program benefits

Organizations and individuals who participate in this session will learn how to increase project value, improve portfolio management and infuse PM best practices into their company culture and existing methodologies.

Attendees will leave the session armed with:

- Project management concepts, techniques and tools to ensure all aspects of a project are organized and managed according to industry (PMI) best practices.
- An understanding of the importance of framing project goals and objectives and the relationships between the major milestones
- Knowledge and skills to lead a project successfully from beginning to end
- Ways to optimize projects to obtain maximum ROI contribution for the business

Experienced and engaging facilitators

All sessions are led by PMP-certified professionals with more than 20 years' experience spanning multiple industries. Our instructors are not lecturers; they are skilled Project Managers and facilitators who introduce proven tools and techniques and use real-life scenarios to teach project management skills.

PMI Certified Provider

As a Project Management Institute (PMI) approved Registered Education Provider (R.E.P.), RiverPoint is committed to enhancing the ongoing professional development of PMI members, PMI-certified Project Management Professionals (PMPs) and other project management stakeholders by offering quality learning experiences and activities.

Participants in our project management training program receive 12 PMI continuing education credits.

Custom programs

Our customizable program enables clients to rapidly instill effective project management skills across the enterprise. Our team is experienced in adapting this training program to meet the diverse needs of organizations. We are expert at customizing the course curriculum to incorporate our clients' methodology, tools, and/or processes to achieve the desired outcome of the training.

Flexible delivery options

RiverPoint's flexible delivery model options include custom training at our clients' site or public training programs at our technical training facility.

Public courses

Project Management training is open to all individuals and can be delivered at our headquarters in Des Plaines, IL. The public sessions are ideal for people seeking to lead projects or interested in real world testing of acquired project management skills. For more information and a public course schedule, please visit www.riverpoint.com.

Register today!

RiverPoint's project management training is designed to give professionals the ability to deliver mission-critical projects On Time, On Budget and Of Value. We focus on transferring PM skills, best practices and tools that can be applied to all projects, and project teams regardless of scope or complexity. The result? Participants and project teams leave our classroom motivated and well equipped to successfully complete projects.
